

Thank you for purchasing our Hard top glider. We are confident you will find this to be the easiest hard top cart to assemble and use. If you have any questions concerning assembly or use of the hard top glider, please call our technical support line at 740/622-9700. 

Assembly:

1. Lay the upright structure on a table or bench with the foam pad facing down that is with the open side of the "U" channel facing up and with the end with the holes extending slightly over the end of the table.
2. Install the legs with the wheels toward you by positioning and installing a bolt through the leg, then through the hole in the "U" channel and then through the heavy flat washer. Flat washer must be installed directly under nuts. Secure with the supplied NyLok nut. Loosely install both bolts in each leg and then tighten all nuts.
3. Caution: Do not attempt to use this cart without fully tightening leg bolts. This could cause permanent damage to the hard top glider and may result in damage of your top.
